Bulletin—Pennsylvania Department of Agriculture—Published bi-monthly by direction of the Secretary. Entered as second-class matter May 15, 1940, at the Post Office at Harrisburg, Pennsylvania, under the Act of June 6, 1900.

Pennsylvania Agriculture

ALTHOUGH long regarded primarily as a major industrial State, Pennsylvania in recent years has received recognition as an increasingly important agricultural production area.

According to the United States Agricultural Census of 1945, Pennsylvania has 171,761 farms, averaging 87.4 acres in size. As of January, 1951, the State Department of Agriculture estimated the value of farm lands, buildings, equipment and machinery at \$1,955,000,000. Livestock and poultry on hand at that time was worth approximately \$405,309,000 and crops on hand \$148,400,000. These three items represent a total investment of more than \$2,508,709,000 in the State's agricultural production industry, comparing favorably with capital invested in the Commonwealth's metal and metal products industries, and with all other manufacturing industries of the State.

Cash income from marketings from Pennsylvania farms amounted to \$749,462,000 in 1949 compared with \$732,434,000 in 1950. In this respect the State ranked 14th in the Nation. In addition, Government payments totaled \$4,828,000 in 1949 and \$6,282,000 in 1950. One third of the 1950 cash income (\$248,007,000) was from dairy products and nearly one-fourth (\$175,077,000) from all poultry and poultry products, the two totaling \$423,084,000. Cash income in 1950 from all livestock, poultry and their products, amounted to \$558,497,000 (76% of total income) and from crops \$173,937,000 (24%).

In 1950 Pennsylvania ranked 1st among all states in the production of mushrooms, buckwheat, cigar leaf tobacco, fall spinach, crops grown under glass, producer-retailed milk and nursery-grown Christmas trees; 3d in clover and timothy hay, peaches, and maple sugar; 4th in grapes and sour cherries; 5th in commercial apples and maple sirup; 6th in pears and sweet cherries; 7th in potatoes, all tobacco and all cherries; 8th in timothy seed.

Pennsylvania in 1950 ranked 3d in value of dairy products, 5th in total weight of calves produced for slaughter, 6th in volume of milk, 8th in number and 6th in value of milk cows and heifers 2 years old and over; 9th in weight of cattle produced for slaughter and 10th in weight of hogs produced for slaughter.

In poultry the State ranked 1st in farm cash income from chickens, 1st in income from eggs; 2nd in combined income from chickens, eggs, broilers and turkeys; 3d in chickens raised, 3d in eggs produced, 3d in numbers and 2nd in value of chickens on farms Jan. 1, 1951; 8th in number of baby chicks hatched; 9th in number and 8th in value of turkeys raised.

PENNSYLVANIA 1950 CROP PRODUCTION

THE aggregate value of PENNSYLVANIA'S principal field and fruit crops produced in 1950, estimated at \$316,706,000 is 7% above their 1949 value of \$296,816,000. Unit values of grains, hay, apples, peaches and pears were higher while potatoes, cherries and grapes were lower. On a tonnage basis production was up more than 1%, the larger hay crop more than offsetting the decline in tonnage of grains, potatoes and fruit.

The winter of 1949-50 was mild until late February when temperatures dropped sharply and then averaged below normal throughout the spring and summer. Snowfall was light and cover for winter grains insignificant in the more important areas. A wintry March and the cool wet spring delayed preparation of soils and planting of spring crops, especially corn. Although precipitation averaged about normal over the State, the west received too much and the southeast too little. Army worms damaged numerous fields of corn, wheat, barley and timothy in west-central and southern counties. Freezing temperatures were not general until late October. Corn, wheat and barley yields fell below 1949 but yields of oats, rye, potatoes, tobacco and hay were higher.

CORN A cool wet spring delayed planting of much corn and conditions throughout the season were rather unfavorable. Development was slow and, although yields were good, much was soft and harvesting was delayed. Japanese beetles and European corn borers reduced yields in most counties, particularly in the south.

WHEAT Despite lack of snow cover wheat came through the winter in satisfactory condition. Some was planted late but made growth during the mild weather of December and January. Harvesting began later than usual. Damage from rust, smut and sprouting in the shock was relatively light.

OTHER
GRAINS

Weather conditions delayed planting of oats, but the cool, wet season favored development and production was good. Reduced acreage allotments for wheat forced a marked shift to barley and acreage increased sharply for the second consecutive year. Army worms damaged a number of fields but overall yields were fair to good. The small acreage of rye for grain made average yields. Acreage of buckwheat was the lowest of record.

POTATOES

Growers planted fewer potatoes this year than in 1949 but yields were record high and production approached 1949 and the 10-year average. Although planting was a little late, the cool season with adequate moisture in most commercial areas favored growth. Quality was the best in recent years.

TOBACCO

Planting of Type 41 tobacco was about 2 weeks late. Setting of plants continued well into July. Cutworm damage was severe in some fields and considerable was replanted. A dry spell in late July hindered growth but development for the season was satisfactory. Type 53 tobacco was harvested in good condition.

FRUITS

Production of commercial apples was more than a fourth below last year but only 5% below average. Crops in non-commercial orchards were large but of poor quality. Peaches were a good crop, only 10% below 1949 but the same percentage above average. Cherries were an excellent crop in commercial areas, especially sours. The grape crop was the largest since 1935.

PENNSYLVANIA FARM LIVESTOCK INVENTORY, JANUARY 1, 1951

FARM inventory value of the five species of livestock (cattle, hogs, sheep, horses and mules) on Pennsylvania farms January 1, 1951 of \$356,478,000 was 14% above January 1, 1950. With chickens and turkeys included, total farm inventory value stood at \$405,309,000, 13% above a year previous. The downward trend in number of horses and mules continued. Sheep showed a 2% increase, the first in 9 years. All cattle totaled 1,808,000 head, the highest since 1895. Milk cows and heifers 2 years old and over kept for milk on farms showed a decrease of 1%, totaling 1,010,000 head on January 1, 1951. Percentage changes between the first-of-the-year inventories of 1951 and 1950 were as follows: cattle, up 1%; hogs, no change; sheep, up 2%; horses down 12%; mules, down 18%; chickens, up 3% and turkeys up 6%.

Changes in value per head over a year previous were: cattle and milk cows, each up 13%; hogs, 27%; sheep 41%; horses, 5%; mules 3%; chickens, 5% but turkeys were down 3%.

CATTLE

The 1% increase in all cattle and calves in Pennsylvania over the 1950 inventory to a total of 1,808,000 head reached the highest point in 56 years. In 1895 the total was 1,822,000 head the last year of a consecutive period of years, back to 1877 when numbers exceeded the 1951 estimate. The highest estimate of record going back to 1867 was 1,975,000 head in 1880. The decline in milk cows and heifers 2 years old and over was 10,000 head. There was a 10% increase in the number of steers 1 year old but the number of all beef cattle on feed commercially was down 5%.

HOGS

Of the 704,000 hogs on Pennsylvania farms January 1, 1951, 448,000 were less than 6 months old, 92,000 were sows and gilts and 164,000 were over 6 months old. The combined spring and fall pig crops, totaled 1,030,000 in 1950, was 5% below the 1949 crop.

SHEEP

The 221,000 head of sheep on farms January 1, 1951 was 2% above the number on the same date a year earlier and represents the first increase in inventory numbers since 1943. The highest inventory number was 2,985,000 sheep on Farms January 1, 1867, the first year of record. The number of ewes 1 year old and over January 1, 1951 was 143,000 compared with 139,000 January 1, 1950. Ewe lambs totaled 36,000 compared with 33,000 a year earlier.

HORSES
AND
MULES

Horse numbers, declining since 1932, were placed at 97,000, down 12% from the previous record low of 110,000 a year earlier. The number of mules, declining since 1936, totals only 9,000 head, an all time record low. Stallions registered in 1950 by the Bureau of Animal Industry, Pennsylvania Department of Agriculture totaled 104, compared with 115 in 1949, 177 in 1944 and 438 in 1940.

POULTRY
AND
EGGS

Hens on Pennsylvania farms increased 12% to 8,102,000 but pullets declined 6% to 15,188,000 while other chickens increased 25% to 4,308,000. Production of eggs set a new record of 3,377,000,000 in 1950, exceeding the previous high in 1949 by 9 percent. Chicks produced in commercial hatcheries totaled 65,710,000 compared with 62,975,000 in 1949. The number of turkeys on farms January 1, 1951 was 184,000 compared with 174,000 a year previous, a 6% increase.

TABLE 1 - RANK OF PENNSYLVANIA CROP PRODUCTION, 1950*

PRINCIPAL CROPS IN PENNSYLVANIA, RANKED BY VALUE, 1950

Crop	Rank	Value
Corn	1	\$100,376,000
All hay	2	91,025,000
All wheat	3	36,450,000
